Hadoop Common / HADOOP-18065

ExecutorHelper.logThrowableFromAfterExecute() is too noisy.

Details

Type:	Improvement	Status:	RESOLVED
Priority:	Minor	Resolution:	Fixed
Affects Version/s:	3.3.1	Fix Version/s:	3.3.2
Component/s:	None		
Labels:	pull-request-available		
Target Version/s:	3.3.5		

Description

```
if (t == null && r instanceof Future<?> && ((Future<?>) r).isDone()) {
    try {
        ((Future<?>) r).get();
    } catch (ExecutionException ee) {
        LOG.warn(
            "Execution exception when running task in " + Thread.currentThread()
                .getName());
        t = ee.getCause();
    } catch (InterruptedException ie) {
        LOG.warn("Thread (" + Thread.currentThread() + ") interrupted: ", ie);
        Thread.currentThread().interrupt();
    } catch (Throwable throwable) {
        t = throwable;
    }
}

if (t != null) {
    LOG.warn("Caught exception in thread " + Thread
        .currentThread().getName() + ": ", t);
}
```

We should downgrade the logging here from warn to debug.

[stevel@apache.org](#) Do I need to put this in branch-3.3 ?
- [Steve Loughran](#) added a comment - 07/Jan/22 14:30
yes please
- [Mukund Thakur](#) added a comment - 10/Jan/22 09:30
Done.
