

Moving logging APIs over to slf4j in hadoop-mapreduce-client-core

Details

Type:	Sub-task	Status:	RESOLVED
Priority:	Major	Resolution:	Fixed
Affects Version/s:	3.0.0	Fix Version/s:	3.0.0
Component/s:	None		
Labels:	None		
Target Version/s:	3.1.0		
Hadoop Flags:	Incompatible change, Reviewed		
Release Note:	In hadoop-mapreduce-client-core module, the type of some public LOG variables were changed from org.apache.commons.logging.Log to org.slf4j.Logger. In the public methods that accepts logger, the logger was changed from org.apache.commons.logging.Log to org.slf4j.Logger.

There is some tests in hadoop-mapreduce-client-jobclient module use the FileInputFormat.LOG, so change them here. Other files of jobclient module will change later.

reattaching patch 005 to resubmit & see what the tests do this time round

resubmitting to yetus. If the patch is ready to go, it's critical to get it in now

ASF license failure off a temp patch file; not important. Tests...maybe, depending on what they are trying to do

stevel@apache.org, [ajisakaa](#), thanks for your review.

Should I resolve the license failure and tests failure here, or just create other issues for these ?

▼  [Akira Ajisaka](#) added a comment - 02/Nov/17 08:39

Thank you for the comment.

Should I resolve the license failure and tests failure here, or just create other issues for these?

The license issue was partially fixed by [HADOOP-14990](#).

```
Lines that start with ????? in the ASF License report indicate files that do not have an Apache license header:
!????? /testptch/hadoop/hadoop-mapreduce-project/hadoop-mapreduce-client/hadoop-mapreduce-client-jobclient/jobTokenPasswd
```

After running the tests, jobTokenPassword was wrongly placed in the root directory of the module. The file should be placed under the target directory, and we need to fix this in a separate issue. TestPipeApplication timeout should be fixed in another separate issue.

Committed this to trunk and branch-3.0. Thanks!
