▼ Description

Accepted allocation proposal and reserved container logs are two exceedingly frequent events. Numerous user reported that these log entries had quickly filled the logs on a busy cluster and seen these entries only as noise.

It would be worthwhile to reduce the log level of these entries to DEBUG level.

Examples:

```
2021-10-30 02:28:57,409 INFO org.apache.hadoop.yarn.server.resourcemanager.scheduler.capacity.CapacityScheduler: Allocation pro
2021-10-30 02:28:57,439 INFO org.apache.hadoop.yarn.server.resourcemanager.scheduler.common.fica.FiCaSchedulerApp: Reserved con
