- The reason is that hftp / hsftp / webhdfs / swebhdfs file system requires an instance of `URLConnectionFactory` to create HTTP / HTTPS connection. `URLConnectionFactory` loads all SSL certificates if there are any. Since there is no certificate in this case, it leads to this warning message.
- This log message is benign but confusing. I propose to change the log level from warn to debug.

- Reopen the issue to change the state from in progress to submit patch, so that it can run through jenkins.

[arpitagarwal](#), i don't see this committed to trunk.

It was committed as [HDFS-6998](#). Unfortunately I realized after pushing that this bug should have been moved to Hadoop common. I just pushed a trunk commit to update CHANGES.txt.
