

Hadoop HDFS HDFS-2868

Add number of active transfer threads to the DataNode status

→ Details

Component/s: datanode
Labels: None

▼ Description

Presently, we do not provide any stats from the DN that specifically indicates the total number of active transfer threads (xceivers). Having such a metric can be very helpful as well, over plain num-ops(type) form of metrics, which already exist.

Tweaked description and summary since we're adding an mxbean method, not a metric.

Looks good Harsh.

Nits:

- I'd make the comment "@Override // DataNodeMXBean" to match all the others
- In TestDataNodeMXBean.java can drop the comment since it says what the following line does (in general comments should say "why" rather than "what" if the "what" is clear
- In getXceiverCount perhaps replace "Gets the live count of transfer threads on the Datanode" with "Returns an estimate of the number of Datanode threads actively transferring blocks".

Patch that addresses all of Eli's comments. Thanks for the quick review Eli!

Thanks Eli.

Failing tests appear to be unrelated (a directory failed to get cleaned up, and all tests seemed to have failed after that - unrelated to

this patch).

Committing to branch-0.23 and trunk shortly.
